## **Wolf Pump Announces Acquisition**

**[Abernathy, TX, 8/17/2020]** — On Thursday, 8/13/2020 Wolf Pump Inc. finalized the acquisition of Robbco Pumps, a vertical turbine pump manufacturer located in Idalou, TX.

The strategic acquisition of Robbco Pumps broadens Wolf Pump's product portfolio of heavy-duty cast submersible and lineshaft turbine product, which is utilized extensively in agricultural and turf irrigation, water and wastewater utilities, commercial, and general industrial market segments. Wolf has acquired the pattern equipment, inventory, machinery, and intellectual property rights of Robbco Pumps.

The acquisition will broaden Wolf Pump's existing line of submersible turbine pumps and result in the addition of a full range of oil and water lubricated lineshaft turbine pumps up to 16 inch bowl sizes, which will allow Wolf Pump to create more value for its customers in irrigation, water utilities, and various industrial markets. The hydraulic range extension will cover capacities from 25gpm – 5,500gpm.

The acquired products will be assimilated into the business under the Wolf brand and will be manufactured and supported by the existing Abernathy, TX facilities. Technical and pricing inquiries should be directed through Wolf's inside sales team and current distribution channels.

Wolf Pump is a complete manufacturer of vertical turbine water pumps and accessories. It has operated out of Abernathy, Texas since 1951 and is a fully owned division of Zoeller Pump Company headquartered in Louisville, KY.
